- 30% of U.S. banks
- 1,200+ U.S. hospitals
- 30+ Blue Cross Blue Shield (BCBS) plans

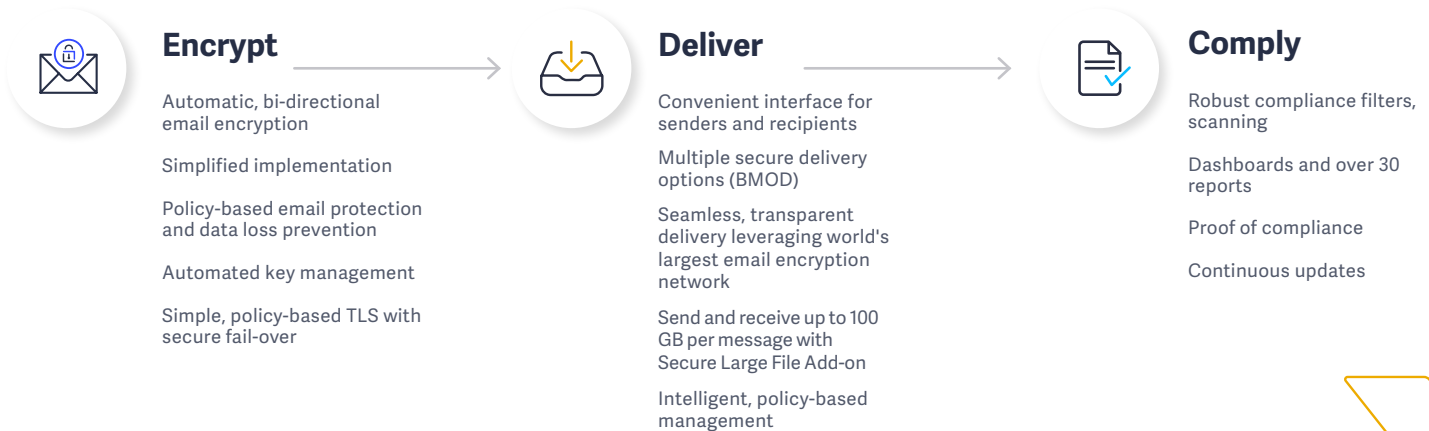

Email is the most vulnerable aspect of your business.

It's all too easy for employees to send sensitive information over the open internet. But if you secure it, you raise your passive threat defense and empower everyone to communicate safely outside of your network.

AppRiver scans the content of all your outbound email and automatically encrypts or quarantines based on policies you define, for any email environment to secure your mailbox far beyond its native capabilities.

Features

AppRiver is simple and convenient, making it easy on users

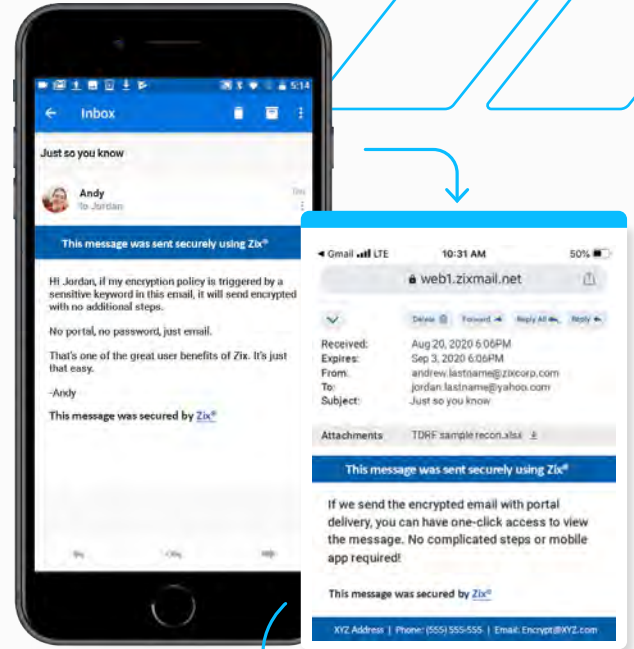

“The installation was very straightforward and the ongoing support has been excellent.”

– Keandall White, VP/CIO, Mount Auburn Hospital

Why AppRiver Encryption Is Different

- ✓ **No-Brainer Encryption Tool:** Significantly lowers the chance of user error and increases awareness of sensitive information inside emails and attachments.
- ✓ **Largest Encryption Network in the World:** 100% of emails between Zix/AppRiver members travel over a secure network—including between customers and partners.
- ✓ **Transparent Gateway Encryption:** No extra steps or passwords for senders or recipients. As easy as regular email. (Uses S/MIME)
- ✓ **Gold Standard in Email Encryption:** 20+ years experience encrypting emails for some of the most sensitive institutions in healthcare, finance, and government.
- ✓ **Empowers safe collaboration:** Seamlessly and securely send and receive files up to 100GB with Secure Large File Add-on.
- ✓ **Administrator and Partner Portal:** Easy to provision and manage users.
- ✓ **Customer-Branded Recipient Portal:** Full email experience and highly customizable.

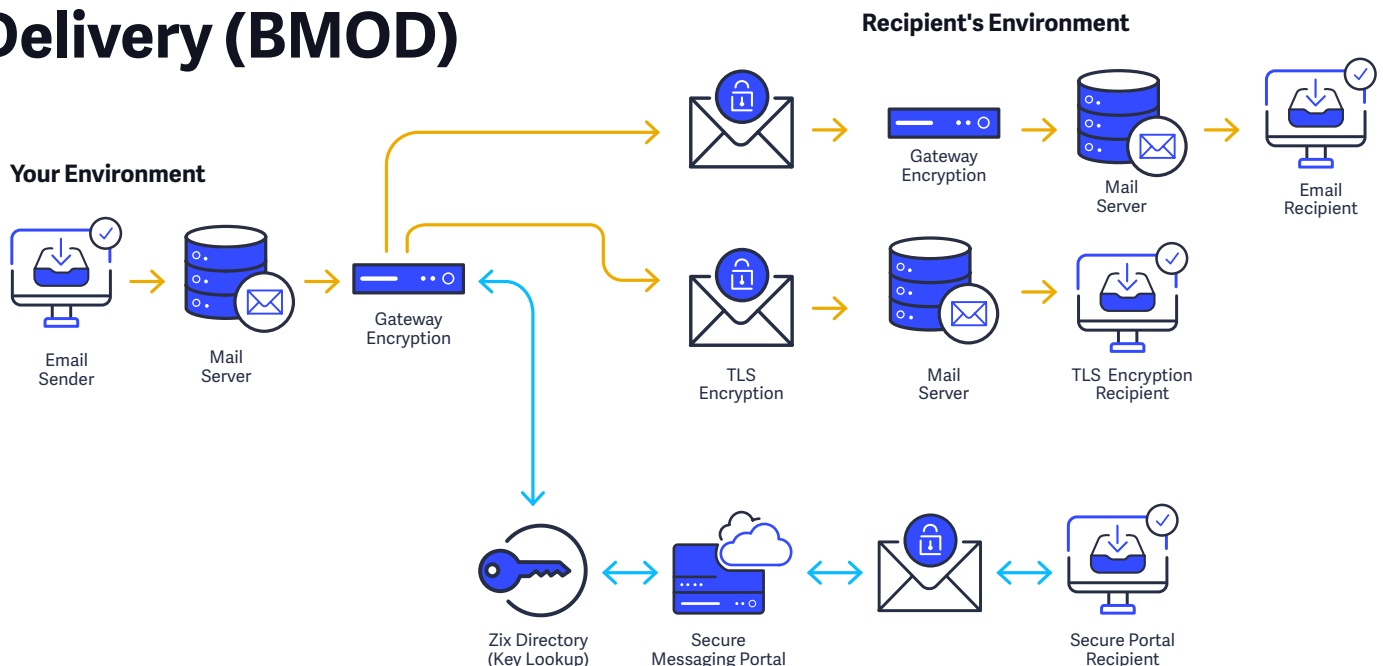

Flexible Controls

- User Management
- Policy Management
- Content Filters
- Quarantine and Alerts
- Routing Actions
- Branding

The key to good encryption is that it's intuitive. Within our network, encryption is on by default, ensuring seamless, bidirectional email encryption among our customers - making safety the standard with no extra steps. Our Email Encryption is powerful, but also usable.

Why Now

It's all too easy for employees to send sensitive information to the wrong parties over the open internet. But if you secure it, you raise your passive threat defense and empower everyone to communicate safely outside of your network.

AppRiver scans the content of all your outbound email and automatically encrypts based on policies you define, for any email environment to secure your mailbox far beyond its native capabilities.

With remote work, employees are looking for an intuitive way to share and receive large files and may turn to Shadow IT solutions for help. Secure Large File Add-on empowers users to collaborate easily using the email tools they already know, while allowing administrators to enforce compliance policies.

The service can also provide senders and managers insight into what caused an email to encrypt, helping to promote awareness of your email compliance policies. And if an unauthorized employee sends an email with sensitive content, AppRiver can quarantine the message and alert management for review.

Why AppRiver

Ease of use paired with industry-leading protection. AppRiver Advanced Email Encryption removes the hassle of encrypting email and gives teams the peace of mind of knowing that sensitive data sent via email is secure. Using advanced content filters, emails and attachments are scanned automatically and any message containing sensitive information is encrypted for delivery. Plus, the convenient interface means it's actually used.

As an integral part of Secure Cloud, AppRiver Advanced Email Encryption works seamlessly with its other Security, Compliance, and Productivity services. Together, they form a fully integrated platform that allows partners and customers to create a secure, modern workplace.
