

EMAIL ENCRYPTION

Make encryption automatic, easy, effective, and defensible

To anyone, anywhere, on any device

Email is the most vulnerable aspect of your business. It's easy for employees to send sensitive information to the wrong parties over the open internet. But if you secure it? You protect all outgoing sensitive information and empower everyone to communicate freely.

AppRiver Email Encryption interfaces with your existing email environment (AppRiver can also host your mailbox) to secure it far beyond its native capabilities.

FEATURES:

- Policy-based email protection and data loss prevention
- Content scanning with robust compliance filters
- Multiple secure delivery options using patented Best Method of Delivery (BMOD)
- Automatic, bi-directional email encryption
- Innovative dashboards with instant access to reports
- Simple, yet comprehensive flexible controls
- Simplified implementation support for policy-based TLS
- Phenomenal Care support

BENEFITS:

- ✓ Provides peace of mind for IT and users
- ✓ Removes the hassle and complexity of encryption
- ✓ Offers convenient, flexible delivery options
- ✓ Intelligent, policy-based management with automatic encryption
- ✓ Protects sensitive and confidential data
- ✓ Compliance with federal, state, and industry regulations
- ✓ Send securely to anyone, anywhere, and on any device
- ✓ Visibility into encrypted email for improved compliance
- ✓ Simple to manage and support with Secure Cloud

"The installation was very straightforward and the ongoing support has been excellent."

– Kendall White, VP/CIO, Mount Auburn Hospital

EMAIL THREAT LIFECYCLE

- a Catch attacks with no payload**
Impersonation protection | Machine learning
- b Delete automatically**
Alert administrator | Quarantine | Message retraction
- c Guard against zero-day threats**
24/7/365 Threat Analysts | Attachment assurance | Time-of-click link protection
- d Secure the entire inbox**
Machine learning | Data Loss Prevention | Message encryption
- e Protect end-to-end**
Inbound and outbound protection | Message encryption | Business email continuity
- f Gain visibility into your email environment**
Executive dashboard | SIEM integration | Detailed message search

The key to good encryption is that it's intuitive. If it's off by default, mistakes will happen. If it's on by default, safety is standard. AppRiver's Email Encryption is powerful, but also usable.

ABOUT ENCRYPTION NETWORK

AppRiver operates the world's largest encryption network. Emails sent from one firm using AppRiver to another travel on a secure pathway that never touches the open internet.

WHY NOW?

Organizations today rely on data and reputation—the loss of either can be catastrophic. And to regulators and auditors, an honest mistake is no different from willful negligence. Those companies that communicate securely build trust and tend to outcompete those that don't. And that starts with encryption.

Your business must take a stance on email security. That starts with a solution that utilizes pre-defined content filters, policy controls, and data loss prevention—and does it all without violating compliance standards and regulations.

WHY ENCRYPTION?

AppRiver Email Encryption removes the hassle of encrypting email and gives companies the peace of mind of knowing that sensitive data sent via email is secure. Using advanced content filters, emails and attachments are scanned automatically and any message containing sensitive information is encrypted for delivery.

Plus, as an integral part of Secure Cloud, Email Encryption works seamlessly with AppRiver's other Security, Compliance, and Productivity services in our Secure Suite. Together, they form a fully integrated platform that allows partners and customers to create a secure, modern workplace.
