

Comply with emerging regulations and shield your business

Unified archiving | 50+ sources | eDiscovery | SimplyShare

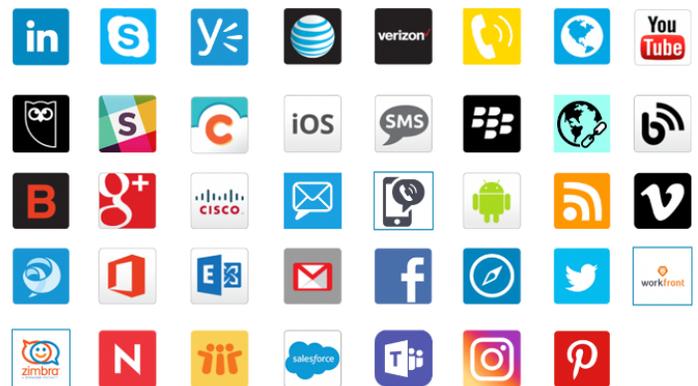

Stay ahead of emerging regulations while fostering a business environment that complies with local laws, standards, and ethical practices related to business communication and content.

AppRiver Information Archiving stores an unlimited number of files and communications across existing platforms such as email as well as emerging ones like Microsoft Teams and social media, to protect an organization from compliance violations and unplanned litigations. It's an essential replacement for organizations that are moving to the cloud and away from aging, on-premise, email-only hardware.

FEATURES:

- Unlimited cloud-based storage and eDiscovery for 50+ data sources
- Proactive dictionary scanning and highlighting
- Data triplication across three geo-redundant datacenters
- WORM-compatible storage that complies with SEC and FINRA storage requirements
- Intuitive data classification workflow and message flagging
- Journal to anywhere technology
- Seamlessly share data with 3rd parties using SimplyShare technology
- Attachment OCR scanning and content indexing for searchability
- Message activity history tracks all user activity at the message level, including exports, views, tagging, comments, and legal holds
- Case management search organization for litigation and HR investigations
- Group supervision (optional)
- In-house lexicographers
- Phenomenal Care support

"AppRiver is a great solution for email encryption, archiving, and peace of mind for security."

Unlimited storage for business communications

More archive data sources

- IM/Collaboration tools
- Social Media

BENEFITS:

- ✓ Stay ahead of changing regulations with updates from AppRiver's Compliance Analyst Team
- ✓ Fast and early case assessment for IT and legal teams
- ✓ Time saving supervision for FINRA and SEC regulated companies
- ✓ Quicker HR investigations powered by message classification and SimplyShare technology
- ✓ Robust archiving capability for 50+ business communication data sources
- ✓ Easy to optimize per business needs
- ✓ Simple to manage and support with Secure Cloud

WHY NOW?

The need for compliance continues to grow and businesses are discovering even greater challenges associated with discovery, implementation hurdles, audits, surprise litigations, legal risks, and even personal liabilities for executives.

While compliance can be challenging, our Information Archiving helps you to stay ahead of changing regulations while maintaining a high level of passive compliance, all with a simple and powerful interface that's easy to provision and optimize.

WHY INFORMATION ARCHIVING?

According to [Gartner](#), 65% of the world's population in 2023 will have its personal information covered under privacy regulations, up from 10% today. Information Archiving lets your organization tackle compliance issues and leverage the opportunities that come with having a centralized system of record and the ability to store and sort communications quickly and efficiently. Plus, as an integral part of Secure Cloud, Information Archiving works seamlessly with AppRiver's other Security, Compliance, and Productivity services in our Secure Suite. Together, they form a fully integrated platform that allows partners and customers to create a secure, modern workplace.
